

# Lukas Bunat

## Software Developer, Data architect

I am a 23-year-old, tech of any kind enthusiast. I have had gradually studied at four different universities in Europe and Asia. I take pride of my international working experiences in software development, managing big data and networking. Additionally, I have also worked in customer service (financial) and education sector. My passion is traveling, especially cross-culture encounters.

My technically analytical thinking allows me finding clever solutions. Furthermore, my vast knowledge, many different skills and abilities, as well as strong opinions, guarantee good decision making. I steadfastly hard-working towards my dreams and goals. I can easily learn new things, cooperate and communicate with others, no matter their background. I am the one, who always wants to lead others by using my own creativity. Yet still reflecting suggestions from others.
